# COLLEGE ADMINISTRATION

OFFICE OF THE ADMINISTRATIVE OFFICER

## CIRCULAR

**Circular No.:** ADM/2026/014 **Date:** 26 October 2026

**To:** All Heads of Departments, Faculty Members and Office Sections

### Subject: Review and submission of updated college and department information

All Heads of Departments (HODs), faculty members and concerned office sections are requested to review the general information maintained by their respective departments and submit any updates to the College Administration Office. The purpose of this circular is to improve the accuracy, consistency and availability of common college information.

The instructions in this circular apply to academic departments and relevant administrative sections. Departments should coordinate with their staff to ensure that information is current, clearly labelled and suitable for its intended audience.

### 1. Information to be reviewed

- **Department profile:** department name, office location, official contact details, office hours and general responsibilities.
- **Academic information:** current course names, programme descriptions, published timetables, academic calendar dates and approved general instructions.
- **Student services:** publicly shareable guidance about certificates, application procedures, office contacts and where to direct common enquiries.
- **Notices and events:** current circulars, meeting notices, seminar schedules, public events and relevant deadlines.
- **Document ownership:** identify the staff member or office responsible for checking and updating each document.

### 2. Submission deadline and format

Please complete the review and submit corrections or replacement documents to the College Administration Office by **31 October 2026**. Each submitted document should have a descriptive title, an issue or revision date where applicable, and a clear indication of whether it is public or restricted. If no update is required, the department should still confirm that its existing information has been reviewed.

This is a demonstration circular created for document-upload and retrieval testing. It is not an official notice issued by a real college.

**CIRCULAR**

## 3. Department-wise responsibilities

Each department should nominate a staff contact to coordinate the review of shared information. The following table provides an illustrative responsibility guide; actual responsibilities should be confirmed by the institution.

| Unit / Department | Information to check | Responsible reviewer |
|---|---|---|
| Information Technology (IT) | Course details, lab information, published timetables, department notices | Department coordinator |
| Student Information / Services | Public service guidance, certificate procedures, office contact details | Student services contact |
| Zoology | Programme information, laboratory guidance, public academic pages | Department coordinator |
| College Administration | General circulars, public policies, office hours, common announcements | Administrative officer |
| Other departments | Department profile, current notices, approved public documents | HOD or nominee |

### 4. Quality checks before submission

- Confirm names, dates, locations, contact details and deadlines against an approved source.
- Remove duplicate, obsolete or superseded copies from the set of documents intended for general use.
- Use readable scans and ensure that pages are correctly oriented and legible.
- Where a document has several pages, check that every page is present and in the correct order.
- Use a meaningful filename, for example: *Academic_Calendar_2026.pdf* or *Office_Hours.pdf*.
- Clearly mark draft documents so that they are not confused with approved notices.

### 5. Public and restricted information

A document should be marked public only when it is approved for access by the intended user groups across the college. Confidential staff records, personal student data, account credentials, private contact information and restricted internal material must not be included in a public collection. When uncertain, keep the document restricted until the appropriate authority confirms its classification.

CIRCULAR

## 6. Recommended document handling procedure

The following process is recommended for maintaining a reliable shared college knowledge collection.

### Step 1 — Prepare

The responsible department reviews the source document, checks its accuracy and confirms that it is suitable for the intended audience. Any outdated information should be corrected by the appropriate office before distribution.

### Step 2 — Classify

Assign an access classification such as **Public / All Departments** or **Department Restricted**. Classification should reflect the institution's access rules, not merely the convenience of sharing the file.

### Step 3 — Upload and describe

The authorised uploader adds the file to the college knowledge system, gives it a descriptive title, selects the appropriate scope and includes available metadata such as department, document date and document type.

### Step 4 — Verify processing

After upload, confirm that text extraction and indexing have completed successfully. If processing fails, check file readability and format, then retry or report the issue to the system administrator.

### Step 5 — Test retrieval

Ask a few questions whose answers are explicitly present in the document. Confirm that the assistant retrieves the relevant information and identifies the source document. Test from more than one department to verify that public documents are available across department filters.

### Step 6 — Review and replace

When a document changes, upload the approved revision and follow the college's replacement or versioning procedure. Ensure that obsolete copies are no longer returned as current guidance.

## 7. Suggested verification questions

- What is the submission deadline mentioned in this circular?
- Who is requested to review department information?
- Which types of information should be checked before submission?
- What should a department do if a document contains confidential information?
- What should be verified after a file has been uploaded?

**CIRCULAR**

## 8. Frequently asked questions

**Q1. Should a public document be uploaded separately for every department?**

No. In a correctly configured system, a public document can be stored and indexed once. Retrieval should include that public document for all permitted department scopes, while keeping department-restricted documents separate.

**Q2. Does selecting “All Departments” in the interface guarantee that everyone can retrieve the file?**

Not by itself. The backend must save the public scope and the retrieval logic must include public documents alongside department-specific documents. Access permissions must also be enforced by the backend.

**Q3. What should the assistant do when the answer is missing?**

It should clearly say that the available documents do not contain enough information to answer, rather than inventing details or presenting guesses as official information.

**Q4. Who should be allowed to upload documents?**

Only users authorised by the college's role and access policy should upload or replace documents. Staff who have query-only access should not be able to change the knowledge collection.

**Q5. What information should be included in an audit record?**

Where supported, record the uploader, upload time, filename, document scope, processing outcome and any replacement or deletion action. Do not store passwords or other secrets in document metadata.

## 9. Action checklist

| Check | Status |
|---|---|
| Department information reviewed | ■ Complete ■ Pending |
| Public / restricted scope confirmed | ■ Complete ■ Pending |
| Document title and date checked | ■ Complete ■ Pending |
| Upload and indexing verified | ■ Complete ■ Pending |
| Cross-department retrieval tested | ■ Complete ■ Pending |
